

Outcome Driven Digital Transformation delivering >10K Story points in 12 months

Challenges

- Multiple cross platform tech transformations stagnated with a legacy model of development
- Incumbent not supporting the customer in their transformation in a Agile way
- Demonstrating efficient ROI for delivered stories

Solution

- Agile POD based delivery across LOB's , with optimized feature teams
- Outcome driven engagement model with standardized metrics and governance across >25 PODS
- Specialized Frameworks & Common Interfaces to host multiple systems, security & sessions management
- Non Value time reduction with Devops and automation across the SDLC
- Dedicated Academy model with Self Starting pods
- Pods ramped in 2-3 weeks of lead-time, across all locations

Value delivered

- 20% effort reduction to deliver per unit Story point
- 50% of pods are ready to move to smaller go-live cycles driving faster lead time to market
- 0.1% defects leakage to higher and live environments.
