

# PSD2 and Worldwide API Banking for a US based bank

## Challenges

- Build BIAN compliant API ecosystem with modern technology
- Mandated PSD2 Compliance and short runway for deployment

## Solution

- Foundation for open API banking through implementation of microservices transformation across the bank
- To demonstrate a working proof of concept for open APIs in banking, in compliance with the EC's PSD2 regulations
- Working in partnership with PNC, BIAN, and IFX

## Value delivered

- A microservices based platform architecture that allows PNC to innovate and develop API's to create a better customer experience
- PSD2 Compliance
