| Escalation Description | B G Mahesh, -Deputy Manager of TKM ISWT team, has escalated to Sathish K with the below escalation comments This email is regarding concerns with the service delivery and lack of ownership displayed by Microland team regarding O365 services I had specifically asked key support persons to be physically present in Plant, which you also promised. However, on Monday, November 20, we faced a critical issue with our Senior Vice president, and your team was unavailable on the site Additionally, many of the diagnostic processes of which your team was completely unaware 1. No check done on the Teams Cache or other basic issues 2. Media logging is not enabled 3. Other than logging a call with Microsoft, no other activity performed 4. Even after communicating with your team, until today no member from the Teams domain reported, and additionally, no information was shared with me on who would be present in the plant. 5. No project management process was followed. No periodic updates unless I keep reminding FYI, there are activities lasting more than 3–4 months in the same state. 6. No reporting done by your team till today regarding the Teams issue which we are working on for the last 2 months. 7. In some domains, this team's technical ability is severely limited to logging calls with Microsoft and nothing else. We even provided trainings on some of these areas with Microsoft, but no use. 8. No Proactive Initiatives on new Technology updates unless it are specifically driven from Toyota 9. Today, November 22, I do not have the presence of your team at the regular morning meeting, and there is no information to me. Please check on how you want to enhance these services, as we are losing confidence in this team day by day. | | | | | | | | |

| Root Cause Details | | | | | | |
|--|--|--|--|--|--|--|
